Outline Electric Radiator

Description

It is now possible to take advantage of the outstanding Outline designs following the introduction of an 'electric-only' version. This radiator is another radiator from the British manufacturer, Eskimo – the perfect combination of beautiful lines and super-powerful radiators.

It's the simplicity of the Outline's design - clean, uncluttered and stunningly opulent - that makes this one of the best examples of a feature radiator.

Available in a standard white (a RAL 9016 with a low sheen) and a number of colour options, it is also possible to colour match to RAL colours and other popular paint companies on request.

You can control your Gong electric radiator with a wireless receiver which can be concealed within the wiring box on the wall and an analogue or digital room thermostat which can control up to 16 radiators from one thermostat. The digital system with wi-fi can be controlled through an app on your smart phone giving full controllability in or outside your home.

Please note : the models listed here include the wireless receiver. You are then free to choose the level of controllability you require by adding either the individual room thermostats and/or the app. Alternatively if you simply want an on/off version we can supply without the receivers.
