Heat By Design

Outline Designer Radiator

Description

This Outline radiator is another radiator from the British manufacturer, Eskimo – the perfect combination of beautiful lines and super-powerful radiators. It's the simplicity of the Outline's design - clean, uncluttered and stunningly opulent - that makes this one of the best examples of a feature radiator.

The inclusion of a new Hinge and Bracket system transforms the radiator into an art and enables pipework and valves to be concealed beneath the outer façade, whilst preserving the controllability.

Available in a standard white (a RAL 9016 with a low sheen) and a number of colour options, it is also possible to colour match to RAL colours and other popular paint companies on request. These radiators are also available in bespoke sizes should the standard sizes not quite fit, or should you have a specific space to fill.
