Cliff Designer Radiator

Description

The Cliff radiator is part of the Outline family from Eskimo Design. The uniqueness of this version is that the finish is achieved using a real stone veneer which offers a palette of organic earthy colours with hints of dark browns, anthracite greys and green hues.

As this is a natural material, no Cliff is identical - a bonus for anyone looking for that one-off piece. However please note : this does mean that a specific design or mix of hues cannot be specified or guaranteed. There are a number of different stone finishes including Barrren Stone, Earthy Pit and Schistian Slater. We have samples in our showroom should you need to take a closer look.

The inclusion of a new Hinge and Bracket system transforms the radiator into an art and enables pipework and the valves to be concealed beneath the outer façade, whilst preserving the controllability.
