Gong Electric Radiator

Description

Gong - Now available in 'Electric-Only'. It is now possible to benefit from the stunning Gong designs following the introduction of an 'electric-only' version. Eskimo, the popular British manufacturer, releases a radiator that is a flawless fusion of beautiful patinated copper and brass finishes and super-powerful radiators. It is the clarity and simplicity of the Gong's design - clean, refreshing and remarkably rich - that ensures this one becomes one of the leading examples of a feature radiator.

The inclusion of a new Hinge and Bracket system transforms the radiator into art and enables pipework and the valves to be concealed beneath the outer façade, whilst preserving the controllability.

The patinations on the Gong are applied by hand using a variation of hot working approaches and colour compounds depending on the finish needed:

Brassy Knoll - A patinated brass – granite grey base with sea green highlights.

Mighty Magmas - A patinated copper – an earthy pallet of burnt orange and rose tones.

Midnight Caller - A patinated brass – aggregate greys washed with a night sky blue.

Dusky Moodstress - A patinated brass – dark chocolate brown with warm golden hints.

Please note: Due to the hand finished nature of the patinas, every Gong varies in tone and pattern each time.

You can control your Gong electric radiator with a wireless receiver which can be concealed within the wiring box on the wall and an analogue or digital room thermostat which can control up to 16 radiators from one thermostat. The digital system with wi-fi can be controlled through an app on your smart phone giving full controllability in or outside your home.

Please note : the models listed here include the wireless receiver. You are then free to choose the level of controllability you require by adding either the individual room thermostats and/or the app. Alternatively if you simply want an on/off version we can supply without the receivers.
